

Environment Artist

Location: Cambridge, UK

Virtual Arts is an Augmented, Virtual and Mixed Reality Tech and Content Company Focused on Games, Animations and Experiences for Mobile Devices.

Experienced and Junior Artists welcome

You'll be part of a growing team creating exciting content (spanning games, animations and interactive experiences) across a range of genres for AR, VR and MR. You'll be able to help define the subject and features of the content you work on. Skills and ideas valued higher than experience. Self-motivation and a desire to tackle challenges with a positive can-do attitude are key. An exciting adventure awaits with opportunities for personal development and career progression.

A day in the life

Work alongside the content team to create unique visual effects across a wide range of products for AR, VR and MR.

Help drive all areas of environment design creating high quality 3d environments based off of concept art and photo reference

Work closely with game, tech and art veterans to ensure visual consistency, consulting reference design documents and planning out the space, with consideration of narrative and visual storytelling

Contribute to daily scrum; share, collaborate and discuss challenges in an open and friendly environment.

Skills you have

- Experience as an Environment Artist or other relevant experience
- Excellent 3D artistic ability
- Expertise in Maya and industry standard software packages such as 3DS Max, Photoshop etc.
- Understanding of lighting/materials and how they behave in the real world and how this applies in games and animations

Skills you might have

- High-low poly baking, modular asset creation, Greyboxing, physically based rendering, sculpting, etc.
- Substance Painter/Designer
- Enlighten or other scene lighting software
- Familiarity with game engines (Unity, Unreal, etc.)
- Mobile development, e.g. Android, iOS
- Game development

Package

We offer competitive salaries, a complete benefit package and equity so you can share in the reward of a growing company.

If you're excited about the future of AR, VR and MR tech and content or know someone who is drop us an email jobs@virtualarts.co.uk and let's have a chat.
